-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 6) ☐ Other: ____.

DETAILED ACTION

1. This Office Action is responsive to the Preliminary Amendment filed August 11, 2003. The Examiner acknowledges the amendment to the Specification, the cancellation of claims 1-47, and the addition of new claim 48. Claim 48 is pending.

Drawings

2. Figures 1A-1D apparently should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities:
- a. In new paragraph [0000.1], line 2, the current status of the parent application should be provided.
 - b. In paragraph [0006], the listed U.S. Patent Application Nos. apparently should be updated and replaced by the appropriate U.S. Patent Nos.
 - c. In paragraph [0056], line 12, "74" (second occurrence) apparently should be deleted. Appropriate correction is required.

Art Unit: 3736

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claim 48 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 5 and 20 of U.S. Patent No. 6,605,047. Although the conflicting claims are not identical, they are not patentably distinct from each other because the device of claim 48 of the present application is structurally equivalent to the device of claim 1 of the patent, but includes an additional limitation to require that the intermediate member extends the length of the marker seat. The intermediate member is equivalent to the flexible covering of claim 20 of the patent, which claim recites a similar limitation to said additional limitation of claim 1 of the present invention. Claim 1 of the present application is merely broader than claim 20 of the patent, which incorporates the limitations of claim 5 of the patent.

Art Unit: 3736

Since the claims of the patent "anticipate" the broader claim of the present application, the claims are not patentably distinct.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Marmor, II whose telephone number is (571) 272-4730. The examiner can normally be reached on M-TH (7:00-5:00).
